CENTURION PLUS

Centurion Plus is an agile and flexible legal services solution designed for short term and long-term legal projects for corporations and public institutions across Germany and Europe.

With all the support, guidance and resources of Centurion Law Group behind us, we're giving top-tier talent and our clients more choice, more control and greater flexibility than ever before.

The demand for legal and advisory services ebbs and flows with the rhythm of the everchanging business environment.

This frequently requires the need for a devoted team and permanent retainers. Similarly, in house lawyers and advisors expend extensive hours in times of peak demand or have very little to do in quieter periods. Regardless, their costs need to be covered.

As a flexible services provider, offering tailored legal and advisory solutions, Centurion Plus is changing the way services are provided to businesses across Germany. Corporations are under huge cost pressures and users of legal and advisory services are looking for ways to make their budget stretch further, without compromising on the quality of counsel that they need to support their business.

Centurion Plus ensures that highly qualified, experienced and talented lawyers are available for clients seeking legal support across all industries on a demand basis.

The platform provides a service that combines the flexibility of an in-house resource with the support and quality assurance of a major law firm. Our lawyers, who pride themselves in integrity, strong ethics and quality delivery, have an in-depth knowledge and understanding of the German regulatory domain and represent the next generation of lawyers who will actively contribute to your company's success.

The Centurion Plus Model

Newlaw At Its Best In Germany

An increasing number of law firms in North America, Africa and Asia are embracing New Law legal services that utilize innovative and client-focused delivery methods.

This model is now accessible in Germany through Centurion Plus.

Our pool of carefully vetted, on-demand lawyers are on call to:

- Administer and govern your projects on short notice;
- Amplify your staffing shortfalls;
- Provide project specific expertise to your team;
- Augment or serve as your in-house counsel.

We will help you build a customized team from our pool of industry specific, specialised and skilled lawyers and business advisors. They will promptly attend to your legal matter more cost effectively than with full-time legal representation.

Benefits of on-demand lawyers:

You control costs: You are not paying for overhead, health benefits, or support for employees you do not need. You are paying for your lawyers' actual services. Not only that, your legal team is not under pressure to meet a quota of billable hours. Their priority is to provide effective and efficient service.

You gain efficiency: Your team's sole responsibility will be the specific instruction you assign them with, which ergo allows them to operate with minimal interruptions and complete projects in a timely manner. Meanwhile, your staff is freed to focus on other pressing projects.

You work with: Increasing numbers of premium on demand lawyers are insisting upon a project-based model because of the enhanced

work-life balance it enables. Working with Centurion connects you with legal talent that you might not have had access to any other way.

You retain control over your projects: With Centurion's flexible model, not only do you hand-pick the lawyers who will work on your projects, but those lawyers answer directly to you. Your priorities are their priorities.

Your lawyers are backed by Centurion: We rigorously screen the lawyers we provide for projects; in this way you can feel confident in their unsurpassed abilities to represent you. We stand behind them and give them the tools and resources they need to ensure successful results.
